SUMMARY: Full-stack and backend engineer with 2+ years of experience designing and scaling distributed systems and data-driven applications using Java, Python, React, and cloud technologies. Skilled in building microservices with Spring Boot and RESTful, optimizing performance with Redis and asynchronous processing, and deploying resilient solutions on AWS and Kubernetes. Experienced across real-time pipelines and high-traffic transactional systems, with a strong focus on data reliability, system scalability, and secure service integration.

EDUCATION

WASHINGTON UNIVERSITY IN ST LOUIS, MCKELVEY SCHOOL OF ENGINEERING, St. Louis, MO

Sep 2021 - May 2023

Master of Science in Computer Science

- GPA: 3.5/4.0
- Related Coursework: Advanced Algorithm, Data Mining, Machine Learning, Rapid Prototype Development and Creative Programming

SOUTHWEST UNIVERSITY, Chongqing, China

Sep 2017 - June 2021

Bachelor of Engineering in Software Engineering

- GPA: 3.7/4.0
- Relevant Coursework: Advanced Mathematics, C/C++ Programming, Java Basic Programming, Data Structure and Algorithms

PROFESSIONAL SKILLS

- Languages: Java, Python, TypeScript
- Backend: Spring Boot, RESTful, GraphQL, Airflow, Flink, Kafka
- Frontend: React, Next.js, Redux, MUI, Apollo Client
- Data & Storage: PostgreSQL, Redis, Databricks
- Cloud & DevOps: AWS (EKS, S3), Argo, Kubernetes, Docker, Helm, GitHub Actions

PROFESSIONAL EXPERIENCE

DAXWELL, Houston, TX

Sep 2023 – Present

Software Developer

- Architected and scaled a **distributed ERP/CRM platform** on **AWS EKS**, owning end-to-end design across microservices, data pipelines, and infrastructure serving multi-team internal and B2B workflows.
- Designed a **high-consistency transactional engine** handling dynamic pricing, contract lifecycle management, and state transitions across **distributed services**, ensuring **data integrity** under concurrent updates.
- Built real-time **supply-demand orchestration** integrating orders, procurement, and inventory using **event-driven architecture (Kafka)**, enabling low-latency synchronization across systems.
- Improved platform scalability and reliability through containerized microservices (**Spring Boot, GraphQL, RESTful, Redis, PostgreSQL**), reducing latency by 60% and supporting high-volume transactional workloads.
- Established secure **service-to-service authentication (Auth0 OIDC, RBAC)** and production-grade observability (**CI/CD, metrics, tracing, logging**), increasing deployment reliability and system resilience.
- Designed a **streaming and integration layer** linking **IoT (Project44)**, **logistics (OTM)**, **CRM (Salesforce)**, and ERP data through **Kafka, Flink** for real-time synchronization and analytics ingestion into **Databricks**.

XIAOMI TECHNOLOGY, Beijing, China

May 2021 – July 2021

Backend Development Intern

- Developed Xiaomi's flash sale functionality for the 618 Shopping Festival, leveraging **Nginx** for load balancing and **Redis** for caching to ensure system stability; implemented **Apache Kafka** and multithreading for efficient asynchronous processing.
- Contributed to the development of a high-traffic WeChat account, using **Apache Kafka** to create a dead-letter queue for message notifications and implementing scheduled message delivery.
- Completed backend requirements for H5 pages, developed real-time Olympic medal tally feature with Spring Boot for scheduled tasks.

WEBANK, Shenzhen, China

June 2020- August 2020

Java Backend Development Engineer Intern

- Developed and optimized a high-performance data system, utilizing **Redis** for efficient data storage and retrieval of financial transactions.
- Implemented backend services using **RESTful API, Spring framework, Spring Boot** to enhance system efficiency.
- Utilized **Apache Kafka** as a message queue to enable asynchronous processing and load balancing to ensure reliable message delivery.
- Implemented a microservices architecture, using **Spring Cloud** to ensure stability and consistency of distributed system.

ACTIVITIES/ INTERESTS

- Scholarships:** Top 10% Engineering College Scholarship (2018-2019), Top 30% Engineering College Scholarship (2017-2018)
- Leadership & Membership:** Computer Science Club Member (2017), Student Union Senator (2017-2021), Facility host at Sumers Recreation Center (2023)
- Volunteer:** 'Timely Rain' Activity (2017), Central Library Activity (2018)
- Interests:** Basketball, Tennis, Texas Hold'em, and Fitness
